

POWERING PRODUCTIVITY: QRX LAUNCHES SOUTH CAROLINA HUB & EARNS HP MPS AUTHORIZATION

QRX Technology Group is proud to announce the opening of its new U.S. headquarters in Mount Pleasant, South Carolina—marking a major milestone in our nationwide expansion. This strategic location strengthens our presence in the Southeastern U.S. and aligns with another key achievement: QRX Technology Group US Inc. is now fully authorized to sell HP Managed A3 and A4 devices, having successfully completed the HP MPS Specialization and Component MPS Offer requirements.

“This expansion reflects our unwavering commitment to delivering smarter, faster, and more secure business technology solutions,” said Grace Martins, President of QRX Technology Group.

With over three decades of industry leadership, QRX continues to evolve as a trusted partner for modern business needs.

The newly opened U.S. headquarters will:

- Serve as a regional hub for Managed Print Services (MPS), Managed PC Services, and Document & Data Management
- Accelerate local response times and on-site technical support for enterprise and SMB clients
- Strengthen partnerships in key sectors—including healthcare, education, finance, and law—throughout the Carolinas and the broader Southeastern U.S.

In tandem, the HP MPS Specialization positions QRX to deliver enhanced solutions through strategic distribution partners. With access to cMPS deal pricing and catalog authorization, QRX is now fully equipped to streamline the delivery and support of HP Managed Devices nationwide.

ABOUT QRX TECHNOLOGY GROUP US INC.
